

Tecnotitlan Data Classification and Encryption Policy

Effective date: 2026-07-05

Purpose

Tecnotitlan classifies and protects data based on sensitivity and business need.

Data Classification

Public

Product catalog data, public pricing, public images, public store content, and published legal pages.

Internal

Operational notes, inventory records, margin calculations, investment records, marketplace synchronization status, and internal dashboards.

Confidential

Customer names, emails, phone numbers, addresses, order information, payment metadata, support messages, API credentials, SMTP credentials, database URLs, and marketplace tokens.

Protection Requirements

- Confidential data must only be accessible to authorized users.
- Secrets must be stored in server-side environment variables or protected configuration storage.
- Payment card data is processed through payment providers such as Stripe. Tecnotitlan does not store raw card numbers.
- Production traffic must use HTTPS.
- Database connections must use provider-supported encrypted connections where available.
- Database access restrictions should be enabled where supported by the database provider.

Retention

Customer and order data should be retained only for business, legal, tax, support, fulfillment, and marketplace operation needs.
